

Topic: Fields

Series of training unsolved tasks for subject „CAD design in landscape engineering“

In locality of Dolnohodrušký tajch (water reservoir) there is sampling of chlorophyll-a performed on regular basis . Results are stored as drawing with placement of sampling location, date, location name and chlorophyll-a content. Data are stored in map and in table in the drawing.

Solve the task:

1. Edit the table so each row contains the data for one sampling location and create the field for name, date and sample value so only the value of attribute will be changed and the values are displayed in table

Author: Ing. Jakub Fuska, PhD., SUA in Nitra, 2018

Created at the Slovak University of Agriculture in Nitra with the financial support of KEGA grant project "007SPU-4/2016 CAD pre Krajinné Inžinierstvo" that was performed in the cooperation with the Matej Bel University in Banská Bystrica
