

Topic: Working with the blocks

Series of training unsolved tasks for subject „CAD design in landscape engineering“

In the drawing of Football stadium in Tekovské Nemce there is drawing of elevation dimension.

Solve these tasks:

1. Create the block from drawing of the elevation dimension, so the elevation value is part of block as editable attribute with name „elev“ (make it exact name of attribute). Name the block „elev_dim“
2. Place this block at each contour with whole-number elevation
3. Change the block definition to block in the drawing „blocks_elevation_dimension.dwg“ (note : Drawing of situation plan is in S-JTSK coordinate system in meters, drawing of block is in millimeters)
