Erasmus+ project 2021-1-SK01-KA220-HED-000032068

# Task 1 focused on the formation of reflective arcs using reflection theory

- Two videos express the correct sequence of reflex arc formation
- From the labelled videos (1A, 1B, 2A, 2B), which of the training procedures for the lie down (daun) and sit down exercises are correct according to reflex theory?

# The Lie down (daun) exercise training marked 1A

ISAGREED

# The Lie down (daun) exercise training marked 1B

ISAGREED

Co-funded by  
the European Union

# The Sit exercise training marked 2A

ISAGREED

# The Sit exercise training marked 2B

ISAGREED

# Task 2 focused on determining the breed of the dog and assigning it to an FCI dog group.

- Indicate the breed and group based on the information.

The breed is characterised by:

- achondroplasia,
- long hair,
- chest circumference 35 – 45 cm,
- use for underground and above ground hunting.

Co-funded by  
the European Union
